BAPS ANZ – Infrastructure Level 1 & 2 Support Analyst (Volunteer/Seva Role)

1) Role Overview

The Infrastructure L1/L2 Support Analyst supports day-to-day incidents and requests for infrastructure and platform services owned and managed by the BAPS ANZ National Technology Team (BAPS ANZ Technology Stack).

This role helps keep national services available, secure, and performing well through monitoring, routine checks, troubleshooting, and good documentation.

Examples of areas may include: Azure/AWS services, core services, identity/access components, infrastructure hardware, storage, backup/DR components, security tooling, and integrations/data platform dependencies (as applicable).

- Department: National Support Team
- Time commitment: ~10–15 hours per week (flexible)
- Reporting line: National Technology Support Lead (functional), with overall oversight by BAPS ANZ National IT Lead
- Works with: National Platform/Infrastructure Team, National Systems (Applications) Team, Local Center IT Admin/Regional Coordinators
- Scope: Support & Service Operations for National-owned infrastructure/platform services within the BAPS ANZ Technology Stack

2) Key Responsibilities

A) L1 – Frontline Infrastructure Support & Triage

- Be first-level support for infrastructure alerts/issues (where assigned).
- Log and track incidents/requests received via email/phone/messages in the agreed Support Tracker (spreadsheet/Microsoft List).
- Perform basic checks and troubleshooting (connectivity checks, service status, known fixes, basic procedure steps).
- Escalate to L2 when the issue is complex, widespread, or needs elevated access.

B) L2 – Deeper Technical Investigation & Fix Coordination

- Handle escalations requiring deeper technical troubleshooting and remediation.
- Perform root-cause investigation for recurring incidents and propose long-term fixes.
- Coordinate with platform owners for cloud/network/storage/security changes as required.

C) Infrastructure Monitoring & Maintenance

- Monitor servers, networks, storage, and cloud environments (as tools allow).
- Perform routine health checks, patching/updates coordination, and preventive maintenance.
- Ensure backup jobs are running successfully and report failures for follow-up.

D) Security & Compliance Support

- Support security hygiene activities (patching, endpoint protection checks, vulnerability follow-ups as directed).
- Follow BAPS ANZ security policies and raise any concerns promptly through the escalation path.

E) Documentation & Reporting

- Maintain accurate documentation of configurations, procedures, and troubleshooting steps.
- Contribute to knowledge base articles and improvements.

F) Project & Change Support (as assigned)

- Assist with infrastructure components of projects (planning/testing/deployment support).
- Participate in disaster recovery and continuity exercises as required.

G) Escalation Path

Escalation Path: L1 → L2 → National Technology Support Lead → National Platform/Infrastructure Team → National IT Lead (and vendor if required)

- Escalate when: service outage, high-impact issue, security concern, repeated failures, unclear ownership, or unable to resolve with runbook steps.

3) Required Qualifications

Volunteer/Seva-friendly: formal education is helpful but not mandatory.

Practical experience in basic infrastructure support and troubleshooting.

4) Technical Skills Required

Windows/Linux fundamentals and basic system administration concepts.

Networking fundamentals (TCP/IP, DNS, DHCP).

Virtualisation awareness (VMware/Hyper-V).

Cloud fundamentals (Azure/AWS).

Backup/DR/storage awareness and basic scripting exposure (PowerShell/Bash beneficial).

5) Technical Certification Required

No certification required (volunteer role).

Preferred/optional: Network+/CCNA; Azure/AWS fundamentals; ITIL Foundation; Security fundamentals.

6) Professional Skills

Strong troubleshooting, calm communication, and good documentation habits.

Ability to prioritise and collaborate with cross-functional teams.

7) Experience Requirements

Recommended: 1–3 years of IT support/infrastructure operations experience (work or volunteering) or equivalent capability.
