Central Warehouse Lead (National)

The National Central Warehouse Lead is responsible for the strategic management and day-to-day operations of BAPS Shayona's central warehousing function, serving as the backbone of supply for all Shayona and Nativ Farms outlets and operations across Australia. Reporting through Shared Services to the Board of Directors, they oversee inbound and outbound logistics, inventory management, storage compliance, and order fulfilment across a high-volume, multi-brand distribution environment. They work closely with the Sourcing & Imports, Finance, QA, and National Retail, Catering, Café, and Nativ Farms leads to ensure timely, accurate, and cost-efficient supply to every centre. All operations are conducted in alignment with BAPS values of seva, discipline, and operational excellence.

Warehouse Operations

- **Day-to-Day Operations:**
  - Oversee all daily warehouse operations including inbound receiving, storage, picking, packing, and outbound dispatch across both Shayona and Nativ Farms product lines.
  - Ensure the warehouse operates efficiently, safely, and in full compliance with food safety, hygiene, and workplace health and safety regulations at all times.
  - Develop and maintain standard operating procedures for all warehouse functions, ensuring consistent and reliable execution across all shifts and teams.
- **Receiving and Inbound Management:**
  - Manage the receipt of all inbound stock from domestic and international suppliers, coordinating closely with the Sourcing & Imports team.
  - Ensure all inbound stock is verified against purchase orders and load lists upon arrival.
  - Record and report any discrepancies, damaged goods, or quality concerns to the relevant national lead and Sourcing & Imports team immediately.
  - Ensure proper storage of all stock upon receipt, including temperature-sensitive, perishable, and dry goods, in compliance with food safety standards.
- **Outbound Dispatch and Order Fulfilment:**
  - Manage the picking, packing, and dispatch of all outbound orders to Shayona Mandir outlets, Café locations, Hall Hire & Catering operations, and Nativ Farms retail and distribution points across Australia.
  - Ensure all outbound orders are accurately fulfilled against approved order lists and dispatched within agreed timeframes.
  - Maintain accurate dispatch records, load lists, and proof of delivery documentation for all outbound shipments.
  - Coordinate freight and logistics partners to ensure reliable, cost-effective delivery to all centres including remote and regional locations.

- **Storage and Layout Management:**
    - Maintain a well-organised, clearly labelled, and efficient warehouse layout that supports high-volume, multi-brand operations across Shayona and Nativ Farms.
    - Ensure all stock is stored in designated, compliant locations and that storage practices meet food safety, temperature, and hygiene requirements.
    - Regularly review and optimise warehouse layout to improve efficiency as volumes and product ranges evolve.

Inventory Management

- **Stock Control:**
    - Maintain accurate and up-to-date inventory records across all Shayona and Nativ Farms product lines held in the central warehouse.
    - Conduct regular stock counts and cycle counts to ensure inventory accuracy and identify discrepancies.
    - Investigate and resolve all stock variances in a timely manner, reporting findings to the relevant national leads and Finance.
- **Demand Planning and Replenishment:**
    - Work with National Retail, Catering, Café, and Nativ Farms leads to forecast demand across all centres and plan stock replenishment accordingly.
    - Coordinate with Sourcing & Imports to ensure the warehouse is adequately stocked ahead of peak periods, major BAPS events, and seasonal demand spikes.
    - Monitor stock levels continuously and initiate replenishment orders proactively to avoid out-of-stock situations.
- **Best Before and Expiry Management:**
    - Implement and maintain a national best-before and expiry monitoring system across all product lines held in the warehouse.
    - Apply FIFO (First In, First Out) and FEFO (First Expired, First Out) principles consistently across all warehouse operations.
    - Identify and escalate near-expiry stock to the relevant national leads for prompt action, including markdowns, redistribution, or removal.
- **Multi-Brand Inventory Segregation:**
    - Maintain clear segregation of Shayona and Nativ Farms inventory within the warehouse to ensure accurate tracking, correct fulfilment, and appropriate cost allocation.
    - Ensure all inter-brand stock movements are recorded accurately for internal chargeback and financial reporting purposes.

Logistics and Distribution

- **National Distribution Coordination:**
  - Manage the end-to-end logistics of distributing stock from the central warehouse to all Shayona and Nativ Farms locations across Australia, including metro, regional, and remote centres.
  - Develop and maintain an efficient national distribution schedule that balances cost, frequency, and service reliability.
  - Coordinate with freight partners, transport providers, and local leads to ensure deliveries are planned, tracked, and completed on time.
- **Freight and Carrier Management:**
  - Manage relationships with national freight and logistics partners, ensuring service levels, pricing, and reliability meet BAPS Shayona's operational requirements.
  - Review carrier performance regularly and recommend changes where necessary.
  - Negotiate freight terms and rates in coordination with Finance and Sourcing & Imports.
- **Remote and Regional Centre Support:**
  - Ensure remote and regional Shayona and Nativ Farms centres receive adequate, timely, and well-planned stock deliveries.
  - Plan distribution schedules for remote centres with additional lead time and contingency, particularly ahead of major events and peak periods.
- **Returns Management:**
  - Manage the process for returning damaged, expired, or incorrectly supplied stock from centres back to the warehouse or suppliers.
  - Maintain accurate records of all returns and ensure appropriate credits or replacements are actioned with suppliers in coordination with Sourcing & Imports.

Food Safety and Compliance

- **Food Safety Standards:**
  - Ensure the central warehouse operates in full compliance with all applicable food safety regulations, including relevant state and national food safety standards for storage and distribution of food products.
  - Work with the QA Lead (Shared Services) to implement and maintain a robust food safety management system across all warehouse operations.
  - Ensure all warehouse team members and volunteers are trained in and compliant with food safety requirements.
- **Hygiene and Housekeeping:**
  - Always maintain the highest standards of cleanliness and hygiene throughout the warehouse.

- Implement and monitor a regular cleaning and pest control schedule in compliance with food safety requirements.
- Ensure all waste, damaged stock, and packaging materials are disposed of promptly and appropriately.

- **WHS Compliance:**
  - Ensure the warehouse operates in full compliance with Workplace Health and Safety regulations, including safe manual handling, equipment operation, and emergency procedures.
  - Conduct regular WHS risk assessments and address identified hazards promptly.
  - Ensure all warehouse volunteers and staff are trained in relevant WHS procedures.
- **Audits and Inspections:**
  - Coordinate and support periodic warehouse audits conducted by the QA Lead and relevant regulatory bodies.
  - Maintain accurate and accessible records of all compliance documentation, including food safety certificates, temperature logs, pest control records, and cleaning schedules.

Volunteer and Team Leadership

- **Volunteer Management:**
  - Recruit, onboard, train, and manage a reliable volunteer team to support all central warehouse operations across inbound, storage, picking, packing, and dispatch functions.
  - Prepare volunteer rosters to ensure adequate coverage for daily warehouse operations, major events, and peak periods.
  - Provide training and ongoing development for warehouse volunteers, covering food safety, WHS, stock management, and operational procedures.
  - Foster a culture of Samp, Suhradbhav, and Ekta across the warehouse team.
  - Encourage Balak and Kishor participation in warehouse seva where appropriate.
- **Vimarsh:**
  - Participate in the monthly national vimarsh meetings and contribute as required.

Performance Monitoring and Reporting

- **Performance Metrics:**
  - Define and monitor KPIs for central warehouse operations, including order fulfilment accuracy, on-time dispatch, inventory accuracy, stock loss, best-before compliance, WHS incidents, and volunteer engagement.
  - Review performance data regularly and identify opportunities to improve efficiency, accuracy, and service reliability.

- Benchmark warehouse performance against industry standards and continuously drive improvement.

- **Reporting:**
  - Prepare and submit a consolidated monthly warehouse operations report to the National Admin BAPS Shayona and relevant Shared Services leads, covering inventory status, fulfilment performance, compliance, logistics, and key issues.
  - Provide regular updates to the Mandir Retail, Catering, Café, and Nativ Farms national leads on stock availability, dispatch timelines, and any supply disruptions.
  - Flag and escalate any significant operational, compliance, or financial risks to the National Admin BAPS Shayona promptly.

Administration

- **System and Record Management:**
  - Maintain accurate and up-to-date records across all warehouse functions including purchase orders, goods received, dispatch records, inventory counts, and returns.
  - Ensure all warehouse documentation is well-organised, accessible, and audit-ready at all times.
  - Identify and recommend improvements to warehouse management systems and processes to support growing volumes across both Shayona and Nativ Farms.
- **Internal Chargebacks:**
  - Ensure all stock movements from the central warehouse to internal departments and centres are accurately recorded and reported for internal chargeback and cost allocation purposes.
  - Coordinate with Finance to ensure all warehouse-related costs and stock movements are correctly reflected in financial reporting.
- **Policy and Documentation:**
  - Maintain a centralised repository of all central warehouse policies, standard operating procedures, food safety documentation, and compliance records.
  - Review and update warehouse procedures regularly to reflect operational learnings, volume growth, and changes in regulatory requirements.
