1. Bank Reconciliation

Bank Reconciliation ensures that the Mandir's recorded cash position accurately reflects actual bank balances. Regular reconciliation is critical for financial integrity, early detection of errors, and reliable decision-making.

- Review bank feed transactions created by Acumatica via automated/manual rules
- prepare the reconciliation statement for Mandir's bank account.
- Identify discrepancies such as missing entries, timing differences, or errors.
- Ensure cash and bank balances are accurate and reliable for decision-making.

2. Ledger Review

A thorough ledger review safeguards the accuracy of financial records and ensures that reports reflect true financial performance before being relied upon by management or auditors.

- Examine general ledger accounts for accuracy and completeness.
- Spot unusual transactions, misclassifications, or errors.
- Maintain integrity of financial data before reporting.
- Correct the misallocated transactions

3. Checking GST Claims

Accurate GST treatment is essential to ensure compliance with ATO requirements and to avoid financial risk arising from over- or under-claiming tax credits.

- Verify that Goods and Services Tax (GST) is applied correctly on each transaction, especially on rent, importation and kitchen groceries.
- Correct any mis claimed input tax credits or output tax charges.

4. Follow-Up on Unreconciled EFT & Cash Transactions

Timely resolution of unreconciled transactions strengthens cash controls and ensures income and expenses are recorded in the correct accounting period.

- Communicate with centres to resolve pending electronic fund transfers (EFT) and cash deposits.
- Prevent delays in recording income or expenses.
- Strengthen internal controls over cash handling.

5. Reconcile Clearing Accounts

Clearing accounts are temporary in nature and must be closely monitored to avoid accumulation of unexplained balances, which can obscure financial clarity.

- Match transactions in clearing accounts (temporary holding accounts) across all centres.
- Ensure transfers, inter-branch settlements, and suspense entries are cleared promptly.
- Avoid buildup of unexplained balances.

6. Project Codes in Acumatica

Correct use of project codes enables transparent tracking of costs and income, supporting informed decision-making at both project and organisational levels.

- Confirm that all transactions are tagged with the correct project codes in Acumatica ERP.
- Enable accurate project-based reporting and cost tracking.
- Support management in evaluating project profitability.

7. Prepare Reports via Velixo

Consistent and well-structured reporting provides management with visibility over financial performance and supports effective planning and budgeting.

- Use Velixo (Excel-based reporting tool integrated with Acumatica) to generate branch-level financial reports.
- Provide insights into performance, budgets, and variances.
- Help prepare budgets for the centres

8. Timely Bank Reconciliation (by 5th Working Day)

Meeting reconciliation deadlines is essential for a smooth monthly close and timely reporting to the stakeholders.

- Complete reconciliations within strict deadlines.
- Ensure monthly financial close is not delayed.
- Support timely reporting to management and auditors.

9. Reminder Notices to Centre Coordinators

Regular reminders reinforce accountability at the centre level and reduce risks associated with cash handling delays.

- Send reminders for prompt cash deposits into the bank.
- Reduce risks of misplacement, or delayed recognition of income.
- Strengthen accountability at centre level.
