1) Purpose

The purpose of this document is to formally define and document the roles, responsibilities, and key functions of the National Accounts Team. It is intended to ensure consistency, accountability, and transparency in financial and administrative processes, while supporting compliance with regulatory requirements, internal policies, and board-approved delegations. By clearly outlining expectations and responsibilities, the guideline enables the National Accounts Team to perform its duties effectively and efficiently, facilitates smooth coordination with centres and national stakeholders, and strengthens overall financial governance and decision-making within the organisation.

2) Fixed Asset

Fixed Assets management is a fundamental financial control that ensures the proper recording, safeguarding, and utilization of long-term organizational resources such as property, equipment, and infrastructure. Accurate tracking of acquisitions, capitalization, depreciation, and disposals prevents misstatements, supports compliance with accounting standards, and strengthens accountability. Maintaining a complete and timely fixed asset register provides transparency for trustees, auditors, and stakeholders, while also enabling management to make informed decisions about investment, replacement, and resource allocation.

a) Capex Proposal

Capital expenditure refers to expenses incurred for acquiring or improving long-term assets and requires prior approval in accordance with the approved delegation matrix.

All capex proposals above the delegated authority must be reviewed and managed by the National Accounts Team before being presented to the Board.

- **Capex Approvals**
  - Receive capex proposals from centres
  - Review proposals for completeness and alignment with delegation requirements
  - Prepare capex submissions using the approved board template
  - Discuss the proposal with National Treasurer
  - If the proposal is rejected by National Treasurer, inform the submitter with the reason.
  - Upon National Treasurer approval, submit the proposal to Company Admin Secretary for the board's consideration.
  - Communicate approved proposal back with related centre.
  - Maintain the register for all Capex Proposal including rejected proposal.

b) Fixed Asset

- **WIP (GL Code – 18010) Review**
  - Review all WIP accounts on a monthly basis
  - Liaise with project owners to confirm the status of ongoing projects
  - Identify completed projects and ensure timely capitalisation
  - Ensure WIP balances accurately reflect current project status

- **Maintenance accounts (GL Code 66305 – 66308) review**
  - Conduct monthly reviews of maintenance expense accounts
  - Identify any capital expenditure incorrectly recorded as maintenance
  - Liaise with relevant centres to correct and reclassify entries appropriately
- **Depreciation**
  - Review depreciation methods and rates periodically
  - Run the depreciation process on an annual basis
  - Ensure depreciation is applied consistently and in line with accounting policies
- Asset revaluation
- Asset Disposal

3) Statutory Compliances

Monthly BAS Submission is a statutory obligation that ensures compliance with taxation requirements and maintains the integrity of financial reporting. The process involves preparing and lodging the Business Activity Statement (BAS) with accurate records of GST and other tax liabilities. Submitting the BAS on schedule not only fulfills legal obligations but also demonstrates sound governance and financial discipline. By embedding accuracy and compliance into each submission, organizations reduce the risk of penalties, maintain credibility with regulators, and provide stakeholders with confidence in the integrity of financial operations.

BAS returns:

- Prepare and Review BAS returns by the due date for BAPS Australia Trust and BAPS NT Trust
- Ensure timely lodgement with the Australian Taxation Office (ATO)
- Forward ATO payment slips to the relevant account's teams
- Maintain supporting documentation for audit and compliance purposes

4) System administration and Controls

System Administration and Control ensure the secure, efficient operation of system by managing user access, configurations, and resources. Strong controls safeguard data integrity, enforce compliance, and provide reliable support for organizational processes.

Stripe

- Create and manage user access
- Maintain appropriate access controls for all users
- Periodically review user permissions

5) Master Data Management

Master Data Management is the disciplined process of creating, maintaining, and governing the core data that defines key business entities such as customers, donors, suppliers, and other data. Effective MDM ensures that this information remains consistent, accurate, and accessible across all systems, reducing duplication and preventing errors that can compromise reporting and decision-making. By establishing standardised definitions, validation rules, and control mechanisms, organizations strengthen data integrity, support

statutory compliance, and enable reliable insights for trustees, auditors, and management. Strong master data practices also enhance operational efficiency by providing a single source of truth that underpins financial processes, resource planning, and strategic initiatives.

a) Data Administrator:

- **RTS**
  - Review donor records for accuracy, consistency, and standardisation
  - Create and maintain donation purposes in RTS in line with National processes.
- **Acumatica**
  - Create and maintain user in the Acumatica
  - Maintain Chart of Accounts and sub-accounts
  - Set up new branches, centres, and para-sabhas in accordance with approved processes
  - Manage the project module, including:
    (a) Creating new projects and project tasks
    (b) Closing completed projects as per guidelines.
    (c) Accounting Period Management
  - Liaise with Acumatica help desk support for any support that team may require.

6) BAPS Charities

a) Accounting:
- Monthly accounts

b) State requirement:
- Licensing Requirement
- Accounting requirement.

c) Ad Hoc:
- Project set up and reporting
