4. Architectural Plan & Design

Role Title: Lead — Architectural Plan & Design

Reports To: Department Head

Role Purpose

This role turns each mandir's vision into a buildable, cost-effective design — from the first concept sketch through to construction-ready documentation.

Key Responsibilities

- **Initial concept plan —** Develops the first concept and layout for each mandir, translating the community's requirements and the site's characteristics into an early spatial plan.
- **Architectural design —** Liaise with external architect to produce architectural design and supporting documentation needed for both regulatory approval and construction, working the concept through to a fully resolved design.
  - Coordinates drawing packages and revisions so documentation stays construction-ready.
  - Ensures design intent is preserved as engineering and construction input is incorporated.
- **Site survey —** Commissions and reviews site surveys and measurements, ensuring the design is grounded in accurate site data from the outset.
- **Coordination with architect —** Liaises with external architects and design consultants engaged on the project, acting as the Sanstha's design point of contact and quality reviewer.
- **Cost-effective plans —** Explores value-engineering and cost-effective design options, working with the Budget & Cost Control lead to keep the design within approved budget without compromising the mandir's architectural integrity.
- **Vimarsh —** Present at the Capital Project Team's regular scheduled Vimarsh.
- **External meetings —** Attends meetings with the external architect and design consultants, where and when required.

Coordinates Closely With

Works closely with the Engineering Service lead (services integration), the Construction & Façade lead (buildability and façade design intent), the Budget & Cost Control lead (design cost implications), and external architects/consultants.
