Capital Project Team

Roles & Responsibilities

A detailed reference for every volunteer leadership role in the Capital Project Team

Prepared for internal volunteer use

6. Information Technology & Infrastructure

Role Title: Lead — Information Technology & Infrastructure

Reports To: Department Head

Role Purpose

This role provides the technology backbone for the mandir and for the project team itself — networking, audio-visual systems, security cameras, hardware and ongoing technical support.

Key Responsibilities

- **IT & networking —** Designs and delivers network and IT infrastructure at both the mandir site and the project office, ensuring reliable connectivity for operational and ceremonial use.
- **Audio-visual (AV) —** Oversees sound, display and live-streaming systems, so darshan, katha and events can be experienced clearly on-site and shared with devotees who cannot attend in person.
- **Security (CCTV cameras) —** Specifies, installs and monitors CCTV camera systems across the mandir to protect people, property and assets, and manages recording, storage and access to footage.
- **IT hardware —** Manages procurement and setup of hardware and devices needed by the mandir and the project team.
- **Technical support —** Provides ongoing support and systems administration once infrastructure is live, keeping IT and AV systems running reliably day to day.
- **Vimarsh —** Present at the Capital Project Team's regular scheduled Vimarsh.
- **External meetings —** Attends meetings with IT, networking and AV vendors or contractors, where and when required.

Coordinates Closely With

Works closely with the Engineering Service lead (shared electrical/cabling infrastructure), the Office & Administration lead (day-to-day IT support needs), and the Construction & Façade lead (installation timing within the build programme).
