BAPS ANZ – Local Center IT Admin (Volunteer/Seva Role)

- Department: Local Centre (IT) / National Support Model
- Time commitment: ~10–15 hours per week (flexible)
- Local reporting line (Centre operations): Mandir Coordinator
- IT functional reporting line: National Technology Support Lead
- Works with: Centre volunteers/users and local departments (IT only), National Technology Support Team (Support Lead, Platform/Infrastructure, Systems/Applications)
- Scope: Local IT Support & Service Operations (locally run applications and infrastructure) + coordination/escalation for National-owned systems within the BAPS ANZ Technology Stack

1) Role Overview

The Local Center IT Admin is responsible for day-to-day IT operations at the local BAPS centre, including support for locally run applications and infrastructure. This role provides first and second level local support (local L1/L2), ensures local IT systems are maintained and secure, and keeps visibility of local IT assets and licenses. Also, as this is locally to the centre so that engagement can be with any department within the centre where they need IT support.

Where an issue relates to the BAPS ANZ National Technology Stack (National-owned applications or platform/infrastructure services), this role coordinates escalation through the National Technology Support Team to ensure timely resolution and consistent communication.

2) Key Responsibilities

A) Local IT Support & Maintenance

- Provide first-line technical support for centre users including devotees, volunteers, and staff (IT-related requests/incidents).
- Maintain and troubleshoot local IT infrastructure (computers, printers, local network equipment, and IT-related AV/meeting devices where applicable).
- Perform routine maintenance activities such as updates and security patching (as applicable and permitted).
- Monitor local system performance/health checks and report significant issues to the National Technology Support Lead when national support is required.
- Ensure local backup procedures are followed (where applicable) and that data integrity is maintained.
- Timely communication with their local team leads for upcoming local events and any national IT specific initiatives.
- Manages and controls local software purchases such as zoom or any other 3rd party subscriptions or communication systems i.e sim card etc – subject to Delegation of Authority or further approval is required.
- Manages any Centre specific YouTube account or channel to ensure no content is released through it.
- Manages Amazone hosted S3 bucket to create and provide support for centre specific subdomain. I.e. adl.bapsanz.org

B) User Support & Training

- Handle day-to-day user requests and technical incidents for local centre IT services.
- Provide basic training to centre volunteers and staff on relevant technology systems and common tasks.
- Support onboarding of new volunteers from an IT perspective (initial setup guidance, access requests via the agreed process, and basic orientation).
- Create and maintain local user guides and simple documentation for common local issues and standard setup steps.

C) Logging & Tracking (No Ticketing System)

- Maintain a simple Local IT Support Tracker (shared spreadsheet/Microsoft List or agreed method) for requests received via email/phone/messages.
- Capture minimum details: requester, centre/area, system impacted, impact, priority, owner, status, actions taken, resolution notes, closure date.
- Keep the tracker current so requests are not missed and progress is visible.
- Share a periodic summary with the National Technology Support Lead (format and frequency as agreed).

D) System Coordination & Management

- Coordinate with National System Teams (Applications/Platform) for software deployments, updates, and changes that affect the centre.
- Manage local user access requests and basic permissions where permitted, including for National systems such as MySatsang, SharePoint, and other devotee/operations systems (via the agreed national process).
- Ensure compliance with National IT policies and security standards, and raise exceptions/risks through the National Technology Support Lead.
- Maintain an accurate inventory of local IT assets and equipment, including periodic auditing of IT assets and relevant IT licenses.
- Safely store all the shared accounts created for local devices or online services such as Gmail, Outlook, iCloud etc.

E) Regional & National Coordination

- Report regularly to the National Technology Support Lead on centre technology status, recurring issues, risks, and local improvement needs.
- Participate in regional IT coordination meetings and training sessions as arranged.
- Collaborate with other Centre IT Coordinators for knowledge sharing and consistent practices across centres.
- Conduct Regular Vimarsh/Meeting with the Local IT/AV/Photo/Security Team
- Attend regular National IT Admin Vimarsh

F) Escalation & Coordination Pathway

Escalation Path (Local IT): End Users/Local Teams → Local Center IT Admin/Coordinator (Local L1/L2) → National Technology Support Lead → National Systems (Applications) Team / National Platform/Infrastructure Team → National IT Lead (and vendor if required).

- Escalate when: issue relates to the National Technology Stack, impacts multiple users/centre-wide operations, is event-critical, is a security concern, is recurring, or cannot be resolved locally.
- When escalating, provide a clear handover: impacted users/centre, system/service, error details/screenshots, what troubleshooting was completed, and urgency (as agreed).

G) Documentation & Knowledge Contribution

- Maintain simple local IT documentation (common fixes, device/room setup notes, local network/Wi-Fi references where applicable).
- Share useful learnings and recurring local issues with the National Technology Support Lead for inclusion in the national knowledge base.

3) Required Qualifications

- Volunteer/Seva-friendly: formal qualifications are helpful but not mandatory.

- Comfortable supporting users and troubleshooting common local IT issues.
- Able to coordinate with local stakeholders and follow the national escalation/support model.
- Diploma or Bachelors in IT or working experience with IT systems or services

4) Technical Skills Required

- End-user support fundamentals (device setup, basic troubleshooting, common productivity tools).
- Local infrastructure basics (PCs/laptops, printers; local network/Wi-Fi checks; meeting room/event device support where applicable).
- Access and permissions awareness; safe handling of credentials and sensitive information.
- Ability to maintain IT inventories and support logs (spreadsheet/Microsoft List).
- Familiarity with Microsoft 365 collaboration tools (Teams/SharePoint/OneDrive) is beneficial.

5) Technical Certification Required

- No certifications required (volunteer role).
- Preferred/optional (beneficial): ITIL Foundation, Microsoft fundamentals, basic networking or security fundamentals.

6) Professional Skills

- Service mindset with respectful, clear communication.
- Strong ownership and follow-through (ensure requests are not missed).
- Good judgement and prioritisation (higher impact issues first).
- Documentation and Knowledge Sharing, Process discipline.
- Ability to collaborate with local teams and the National Technology Support Team.

7) Experience Requirements

- Recommended: practical experience in IT support (work or volunteering) or equivalent hands-on capability.
- Nice to have: experience supporting IT in event/meeting environments, asset/license tracking, and coordinating escalations across teams.
