BAPS MIS & Digital Systems Seva Guidelines

ANZ Satsang Development Committee (SDC) – Digital Systems / MIS Lead

Draft v1.2 – for review

1. Objective

1.1. The objective of this document is to explain the role of the Digital Systems / MIS Lead and the seva expectations attached to it:

1.1.1. to maintain accurate roles, positions and mandal structures within BAPS MIS in line with approved seva changes

1.1.2. to ensure every appointed karyakar has the correct Sanstha Seva email account for their role

1.1.3. to provide the reporting systems and dashboards through which Satsang Pravrutti information is collected and presented

1.1.4. to configure mySeva so that Sampark activity can be recorded and reported accurately

1.1.5. to maintain data integrity, confidentiality and appropriate access across all systems

1.1.6. to build, maintain and increase Samp-Suhradbhav-Ekta

1.1.7. to earn Satpurush's rajipo

2. Role of the Digital Systems / MIS Lead

2.1. The seva covers five processes:

Process	Output
Rollout BAPS MIS and MIS eco system	BAPS MIS and the associated MIS ecosystem are successfully implemented, configured, and operational
Seva change data into BAPS MIS	Roles and positions kept current against approved changes
Seva email accounts with National IT	Sanstha email assigned to each Satsang Pravrutti role
EMS and Power BI reporting	Para Sabha collection in EMS; dashboards for Power Apps reports
mySeva configuration	Sampark activity reports configured and available

2.2. **Reports are collected by Central Office.** The MIS Lead does not collect or follow up reports. The seva is to build and configure the systems through which collection and reporting happen.

2.3. The MIS Lead works under the guidance of P. Kothari Sant, SDC Admin and the respective SDC leads. Configuration or changes requiring approval are implemented only after that approval is received.

2.4. The MIS Lead does not determine Satsang policy, appoint karyakars, or change organisational structures on his own initiative.

3. Rollout BAPS MIS and MIS Ecosystem

3.1. Coordinate and manage the rollout of BAPS MIS and its associated MIS ecosystem, ensuring the required systems, configurations, data, users and processes are implemented and operational.

3.2. Coordinate the implementation and availability of supporting MIS capabilities, including EMS, Power BI, Power Apps reporting, mySeva, Sampark reporting and other approved integrations or services.

3.3. Implement and maintain visitor registration through BAPS MIS using approved QR-code methods, such as BAPS MIS QR Code, Jotform QR Code or other approved solutions, ensuring registration data is accurately captured

4. Seva Change Data into BAPS MIS

4.1. Collect approved seva change data through the approved Seva Change process, and enter it into BAPS MIS against the correct role and position.

4.2. Maintain and configure Type A, Type B, Type C and Type D Mandals in the BAPS MIS Entity Master so that configuration reflects the approved ANZ SDC structure.

4.3. Maintain the required roles and positions for each Mandal type, and create new roles or positions based on information received from SDC and/or P. Kothari Sant.

4.4. Role and position changes are entered only after the appropriate approval has been received. Where information is unclear, incomplete or conflicting, flag it and seek clarification rather than making an assumption.

4.5. Review configuration periodically and identify discrepancies between the approved SDC structure and BAPS MIS.

5. Seva Email Accounts

5.1. Liaise with the **National IT team** to create Sanstha Seva email accounts for the Satsang Pravrutti roles created under a new assignment.

5.2. Ensure the required naming convention and access rules are followed, and that each account is aligned to an approved seva position rather than an individual.

5.3. Maintain records of Seva email accounts against their associated karyakar positions.

5.4. Process transfers and access updates when a karyakar's seva changes, and arrange removal or modification of access promptly.

6. Reporting Systems – EMS & Power BI

6.1. Create and configure **EMS** for the collection of **Para Sabha reports**, including the required event templates and fields.

6.2. Build and maintain **Power BI dashboards** for the reports collected through **Power Apps**, so that the collected information can be presented for review.

6.3. Test configurations and dashboards before release, from the perspective of the ANZ karyakar and end user, so that issues are identified before wider use.

6.4. Support access and role assignment for EMS and Power Apps, and coordinate with the relevant IT team where an issue cannot be resolved locally.

6.5. Where a system fault or configuration error is preventing submission, raise it promptly with Central Office so that no mandal is disadvantaged by an issue outside its control.

7. mySeva & Sampark

7.1. Configure **mySeva reports for Sampark activities** so that Sampark activity can be recorded and reported accurately.

7.2. Create Sampark Projects – Special and Regular – and configure the relevant survey within each so that the required information is collected. Create a Sampark Project for each Mahotsav as advised by SDC and/or P. Kothari Sant.

7.3. Maintain records of project and survey configuration so that future changes and troubleshooting can be carried out efficiently.

7.4. Support access to mySeva and provide guidance on how Sampark personal information is edited through mySeva after approval in BAPS MIS.

8. Master Data & System Consistency

8.1. Maintain and update the SharePoint master records required for SDC planning, reporting and administration, including:

- Mandal masters – Type A, Type B, Type C, Type D and Temporary
- Sabha masters – Weekly, Para, Regional, Vadil, Hindi, Yuvak, Yuvati and Mahila Sabha

- Other Goshthi, Vimarsh, and Mahotsav / Utsav masters

8.2. Changes to master records are made only from approved information received from the relevant SDC position or authorised source.

8.3. Maintain consistency between SharePoint, BAPS MIS, Power Apps, mySeva and EMS where information overlaps. Where master information changes, identify any related system that requires updating.

8.4. **Data integrity:** where data is missing, ambiguous, conflicting or unverified, it is reported as a flagged gap. Information is never estimated or assumed simply to complete a master or report.

8.5. Maintain records of major configuration changes so that the reason and source of a change can be identified later.

9. Confidentiality & Access Management

9.1. BAPS MIS records, person information, Sampark information, karyakar details and system access information are confidential and are used only for authorised Satsang Pravrutti purposes.

9.2. Access to Azure, Seva email, SharePoint, BAPS MIS, Power Apps, mySeva, EMS and Power BI is provided according to the approved seva position, and **is not shared between karyakars**.

9.3. When a karyakar's seva changes, access is reviewed and updated promptly.

9.4. System data is not stored or forwarded through unauthorised personal accounts or platforms.

9.5. Follow all applicable Sanstha guidance on information security, privacy and use of Sanstha-provided systems.

10. Team Development & Coordination

10.1. The MIS Lead should manage the team, assist team members when required and help resolve issues encountered during seva.

10.2. Document important configurations, processes, recurring issues and solutions, and share knowledge so that critical system functions do not depend on a single individual.

10.3. Maintain regular communication with SDC Admin, Central Office, the relevant SDC leads and the National IT team.

10.4. Keep SDC leadership informed of significant system issues, access problems, data concerns and planned changes. Matters with wider regional impact are raised before implementation.

10.5. Recognise achievements and exceptional seva in front of P. Santo and SDC leadership during planning meetings, and create a positive team working environment so that samp is sustained as per Bapa's ruchi.

11. Other Notes

11.1. System functionality and processes may change as BAPS MIS, EMS, Power Apps and mySeva are enhanced. Karyakars should follow the latest approved process and system guidance.

11.2. All system development, configuration and access changes must remain aligned with approved Satsang structures and guidance from P. Santo, SDC Admin and the relevant SDC leadership.

11.3. Guidelines and information provided in this document are not extensive. Additional guidelines and/or information will be provided through various formal and informal channels (written, through meetings, in person, over the phone or virtually) as and when deemed necessary under P. Santo and SDC Admin's guidance.
